EXPERIENCE

Internship and Independent Study (MSIB) Merdeka Campus Alterra Academy

I have participated in a program organized by the government in collaboration with Alterra Academy, which includes an internship and independent study. In this program, I chose to join the "Understand Everything About Vue JS Front-End Engineer" program. The program is designed to provide a comprehensive understanding of the Vue JS framework, covering everything from project creation to project deployment. During the course, I delved into various aspects of Vue JS and gained hands-on experience in developing projects using the framework. The program focused on enhancing my skills as a Front-End Engineer, enabling me to build efficient and dynamic user interfaces with Vue JS.

Practicum Assistant Faculty of Computer Science of University Brawijaya

I have experience as a teaching assistant in the field of information system implementation and testing. As an assistant, I have actively contributed to teaching and supervising practical sessions related to the implementation of information systems. Additionally, I have been involved in conducting comprehensive testing procedures to ensure optimal quality and functionality. My role includes assisting students with hands-on learning, providing guidance during practical sessions, and conducting thorough testing to validate the efficiency and effectiveness of the systems being implemented. Through my experience, I have developed a strong understanding of the practical aspects of information systems and the significance of rigorous testing in delivering reliable and high-performance solutions.

SKILLS

- HTML, CSS, Javascript
- Vue JS
- Bootstrap
- PHP
- Laravel

EDUCATIONS
